4.	Name of the Project Guide:	Mr.P Raju	
5.	Title of the Project:	TaraShield: Constellation-Based Cryptographic Key Generation with Secure Blockchain Transfer.	
6.	Abstract:	This project introduces a sophisticated cryptographic system that integrates constellation-based encryption with blockchain technology to ensure secure and reliable data transfer. Cryptographic keys derived from celestial parameters offer a novel and robust approach to encryption, while blockchain technology provides a decentralized and tamper-resistant mechanism for key transfer. By combining astronomical insights with advanced security frameworks, this system establishes a new benchmark in cryptographic innovation for secure communication.
